## Budget

Thanks to Republican-led budgets, our revenues are up, and we are on a path to better protect taxpayers now and in the future.

- This budget puts \$317 million into the Rainy Day Fund.
- We passed legislation to ensure taxpayer dollars are accounted for and the administration can be held accountable for supplemental spending.
- Our record of holding the line on tax increases and spending is proven correct by the increased revenues. This budget continues to build on those ideals:
  - We are strategically investing while also backing up our legislative priorities with the funding to make an impact to attract and grow more job creators and familysustaining jobs.
  - We are committed to our agricultural and farming community, ensuring the Commonwealth's No.1 industry has what it needs to thrive.
  - We are strengthening victim rights, protecting communities and helping those battling addiction.
  - We remain committed to educating for success. We recognize that students find success in different

- ways. School funding is increased, but so is funding to support opportunities for students to thrive in private, charter and online schools.
- o Employers are searching for employees with the right skills for the modern workforce. We complement this search by promoting career and technical education expansion ideas so Pennsylvanians can get the training, skills and tools they need to succeed in careers that pay far more than minimum wage.

## **Economic Enhancers**

### **#GOODJOBS4PA**

House Republicans are looking at new pathways to careers with a greater focus on providing students with job skills *before* they leave high school. Students would benefit from knowing what kind of job or career they are headed for before taking on huge amounts of debt for a college degree they may never use.

While equipping students with workplace skills addresses the needs of one segment of the job-seeking population, our members are also offering solutions for unemployed adults, soon-to-be-released inmates and returning military veterans.

Ultimately building an effective workforce system is essential to economic development. Simply, you need people to be successful as they work in the jobs that are created. Our caucus is working on all sides of the issue, creating a world-class workforce and growing world-leading industries, which will lead to the next generation of great companies and employees calling Pennsylvania home.
